

ROOM 100

Room 100 has completed numerous projects for Mr Dick King -Smith. Our latest brief was to create a bedroom suite on the ground floor of his house to include various structural changes, moving his utility room, and a clean lined 'Wet room'. His W/c Should be wall hung at a higher than standard level, and he shouldn't have a step or door to negotiate for showering

As Mr King -Smith recently gave up writing & took up Poetry he was kind enough to pen a small piece for us

My Move downstairs By Dick King-Smith
*The stairs in my old cottage
They are as steep as hell
And even though I said I could manage them quite well
My family did not agree
They said the stairs would always be a hazard !!!!!
"You must move" they said,
"Before you fall and end up dead"
"Even if you bust a bone or two, move down you must"
"A down stairs bed's the thing for you"
"That's what you must agree to do"
"The dining rooms the place to go"
"And next to it you'll need you know"
"A Lavatory & a shower"
"You'll need new lights and points to power"
"Washing machine, deep freeze & piles of other things"
"And lovely tiles"
"Below the walls, a handsome floor"
"And you will need a wider door"
"All must be done in first class taste"
"There isn't any time to waste"
"That's what you must agree to do"
"O.K "I said "But what about a builder who can plan all this out"
My Family gave such a SHOUT!!!!
"Who? Why there is no doubt
"The Answers Room 100"*
